

**Standard features include:**

- Single piece base and tank are constructed of fiberglass reinforced polypropylene for strength and chemical resistance.
- High-Flow™ manual air relief valve and continuous internal air relief work together to maintain optimum filtration efficiency at all times.
- Removable cartridge makes cleaning easy.

## Crystal clarity with cartridge convenience

Looking for top-end filter performance with the lowest maintenance? Look at a cartridge filter. This long-proven design uses special filter elements to strip particles from pool water with great effectiveness...particles so small they are measured in microns...particles the human eye cannot even detect.

Maintenance? Open the top. Remove the cartridge. Hose it off. That's it.

But all cartridge filters aren't the same. And the secret to the most effective filters is the design and consistency of the cartridge itself.

All Pentair filters feature cartridges made to demanding specifications under the strictest quality control standards. This ensures they produce the cleanest and clearest water while standing up for the long run.

Clean & Clear filters also feature durable fiberglass reinforced tanks with locking ring clamp for safety.

# Clean & Clear®

Cartridge Filter

## Carefree...by design

Like all Pentair cartridge filters, Clean & Clear features an easily cleaned cartridge for the ultimate in carefree pool filtration.

### Other features include:

- Self-cleaning 1 1/2" drain and washout for convenience.
- Innovative lock-ring requires only 1/3 of a revolution for a safe, leak-proof seal.
- 2" plumbing for maximum flow.
- Single piece base and body designed for maximum durability.
- One-year limited warranty. See warranty for details.

### Clean and Clear—Cartridge Filter

| Model Number | Filter Area Sq. Ft. | Vertical* Clearance | Filter Diameter | Flow Rate GPM |       | Turnover Capacity-Res. (Gallons) |        |         |
|--------------|---------------------|---------------------|-----------------|---------------|-------|----------------------------------|--------|---------|
|              |                     |                     |                 | Res.**        | Comm. | 6hrs.                            | 8hrs.  | 12hrs.  |
| CC 50        | 50                  | 30"                 | 15.5"           | 50            | 19    | 18,000                           | 24,000 | 36,000  |
| CC 75        | 75                  | 39"                 | 15.5"           | 75            | 28    | 27,000                           | 36,000 | 54,000  |
| CC 100       | 100                 | 61"                 | 15.5"           | 100           | 38    | 36,000                           | 48,000 | 72,000  |
| CC 150       | 150                 | 76"                 | 15.5"           | 150           | 56    | 54,000                           | 72,000 | 108,000 |
| CC 200       | 200                 | 76"                 | 15.5"           | 150           | 75    | 54,000                           | 72,000 | 108,000 |

\*Required clearance to remove filter elements

\*\*Maximum flow rate
