

The design that unleashed a new era in whisper-quiet operation

The right pump should circulate all pool water at least once a day...as efficiently as possible. Greater efficiency means lower utility costs...and the key lies in the heart of the pump's design. The secret is to minimize friction and turbulence. Less friction means greater efficiency. Less turbulence means less noise.

That's why all Pentair pumps feature a proprietary hydraulic design that's been refined over 40 years for superior performance. In fact, they are so efficient they often deliver the required flow and pressure using smaller horsepower motors—which cost less to run. No wonder more than 2 million Pentair pumps have been selected by pool professionals.

WhisperFlo's innovative hydraulic design moves water more efficiently and more quietly than competitive pumps. Under typical operating conditions, WhisperFlo offers the greatest water flow of any high performance pump—yet with the lowest electrical consumption. WhisperFlo is engineered to provide optimum performance in a complete range of installations, including pool/spa combinations. It also delivers the power needed for suction-side, pressure-side, and in-floor cleaning systems.

Standard features include:

- Lower operating costs. Less horsepower required to produce needed water flow, even when used in pool/spa combinations and when operating in-floor cleaning systems.
- Whisper-quiet operation documented in rigorous ETL tests.
- Patented oversized strainer basket reduces cleaning frequency.
- Easy-view lid design for instant inspection will remain clear and strong for years. Plus, the clamp delivers even pressure to eliminate air and water leaks.

WhisperFlo®

High Performance Pump

Simply the most efficient and quietest pump you can buy

Maximum circulation efficiency at the lowest operating cost. Long trouble-free life. Minimal maintenance. WhisperFlo, the incredibly quiet, incredibly reliable pool pump outperforms the competition by every measure.

Additional features include:

- Oversized strainer basket utilizes durable, flexible material for long life.
- Unique FunnelFlo™ diffuser and high-efficiency impeller maximize water flow and energy efficiency while minimizing turbulence and noise.
- WhisperFlo is made with high-temperature, engineered thermoplastic to withstand extreme heat and prevent corrosion.
- Energy efficient motor features commercial grade frame, rust-proof stainless steel shaft, and permanently lubricated, sealed bearings for long, trouble-free life.
- Available in single- and two-speed models.
- One-year limited warranty. See warranty for details.
